

SECRET

OSA 5567-63

1 November 1963

MEMORANDUM FOR: Deputy for Technology, OSA

ATTENTION:

SUBJECT: Operating Parameters for New Films

REFERENCE: 5796, Dated 31 October 1963

1. Although this memorandum refers specifically to type SO-205 film, it is equally applicable to all film which is new or may be supplied to our operating detachments.

2. Please provide Operations Division, OSA, with specific instructions for using each type of film which is authorized or recommended for their use. As a reminder of the kind of data they need, the following list is suggested:

- a. A statement that the film is accepted as operationally useable.
- b. Any restrictions on its use.
- c. Camera system in which it may or must be used.
- d. Camera settings required or permitted.
- e. Minimum and/or maximum sun angles permitted under any conditions.
- f. Minimum desired sun angle for best or adequate exposure.
- g. Sun angle limits (if this applies) for best exposure.

ILLEGIB

SECRET

OSA 5867-83

- h. Any restriction on the processing center which must or should be used.
- i. Sun angle or other condition at which camera settings should be changed; e.g. sun angle at which the two-speed shutter should be switched from low to high speed and vice-versa.
- j. Any terrain or atmospheric features which would prohibit use of certain film/camera/camera setting combinations.

3. Without a photographic specialist available for consultation at all hours, it is necessary for all camera operating instructions to be very specific.
